*Duetto*

the friendly diaper

---

# THE BABY DIAPER YOU HAVE BEEN WAITING FOR

DUETTO is a definite shift compared to the traditional baby diaper, it satisfies many needs:

- it helps to prevent skin rash
- it reduces significantly the waste
- it has a cool look and dresses like a pair of shorts

Levita DUETTO is a hybrid diaper, half way between a disposable and a washable diaper. It is made of two components:

- a very light, thin, cool pair of shorts you can easily match to the other baby clothes
- an absorbent pad with fabric and core made in pure natural cotton

DUETTO is environmentally friendly, you can use it many times after a quick and light washing cycle. You need to dispose only of the absorbent pad, which takes care of the 'dirty job'

Levita DUETTO is the first diaper ever to offer a fashionable look, comfort, wellness and a positive contribution to waste reduction.

## MADE OF COTTON FOR THE MOST SENSITIVE SKIN

The outer fabric of DUETTO washable short is a technical, ultra-breathable, elastic and antibacterial product. The inner fabric is soft, natural, anallergic cotton.

All components have been selected to provide the highest wellness to the baby. They have been qualified and certified according to the most demanding international standards to be safe for the delicate baby skin.

DUETTO is the one and only diaper with the absorbent core and pad outer fabric made in pure cotton. Where all the others claim to be just like cotton, we simply say it clear that DUETTO is cotton.

Thanks to the quality and properties of the selected materials (mainly cotton and other natural products) and the zealous manufacturing, Levita DUETTO is particularly suitable for babies sensitive to diaper dermatitis and erythema.

# COOL AND GLAMOUR LIKE THEIR MOTHER

Levita DUETTO has a brand new design to make sure that your children look as cool and glamorous as their mother!

Trendy design and colors get renewed every season, just like a fashionable dress. You will not want to hide your children with their diapers any longer. With a hint of vanity, you will show them around helping your children to become more self confident.

The thin crotch avoids bulkiness between the legs, whilst the high waist high on the back and low in front provides more freedom of movement and a cool look.

The outer fabrics are light and pleasant to look at, just like a shirt. They are easy to wash and, more important, quick to dry.

Levita DUETTO is one of the lightest diaper ever and dressing DUETTO is a vanity choice.

Adding Levita DUETTO to your clothing collection is not only a necessity, but a desire to change just as you buy a new dress or a new shirt.

# ENVIRONMENTALLY FRIENDLY

Levita DUETTO helps to reduce dramatically the waste because it is reusable.

You dispose only of the absorbent pad, whilst you reuse the shorts after a quick wash and a very quick dry.

Contrary to the disposable diapers, you do not throw away after each change the chassis, the fasteners, the elastics and the side barriers. You reuse Levita DUETTO many times.

In addition, you increase the quality of your waste as the majority of the materials of the absorbent disposable pad are biodegradable.

There is no disposable diaper on the market more biodegradable than Levita DUETTO.

Not a single tree gets cut down to produce Levita DUETTO

Levita DUETTO is manufactured minding the environment, so to deliver to your children a better world tomorrow.

# THE EASIEST AND SAFEST SYSTEM

Levita DUETTO is easy to use and safe.

To change your baby you simply have to replace the absorbent pad.

The design of the absorbent pad protects the side barriers do get dirty and very frequently you will see that there is no need to wash the shorts, it will be sufficient to 'reload' the absorbent pad.

In case of light dirt you can quickly wipe off the spots with cold water. Otherwise you may want to go for a quick washing cycle.

You will be surprised to see how fast you can wash and dry the shorts, thanks to the quality of the materials.

This is why we recommend hand wash, instead of machine wash.

Contrary to the standard washable diapers, Levita DUETTO absorbs like a common disposable diaper.

Such a performance is due to the patented technologies of our Research and Development department.

Now you can get the safe and dry performance out of your diaper, without feeling guilty for your waste.

# LEVITA... A CHOICE OF HEART

Levita Srl was established in 2010, by entrepreneurs with more than 25 years of seniority in this business, who decided that it was time for a new reusable diaper, high performing, long lasting and environmentally friendly.

Thanks to the expertise of our team, with a long and profitable knowledge acquired in big multinational companies worldwide, we can proudly offer today an innovative product designed by Levita.

Our main goal is to provide a the right product for your baby.

The product design department is in Crema (CR), with a distinguished Italian style and manufactured with selected materials of high quality and performance.

Our labs guarantee the ethicality of our products in Italy and abroad.
